Wrenmill Community House

A one-page homepage for a made-up small-town nonprofit. I built it to show the kind of site I make for a community organization: this week's events, ongoing programs, hall rental, volunteer sign-up and a donate block. Names, times, prices and contact details are placeholders.

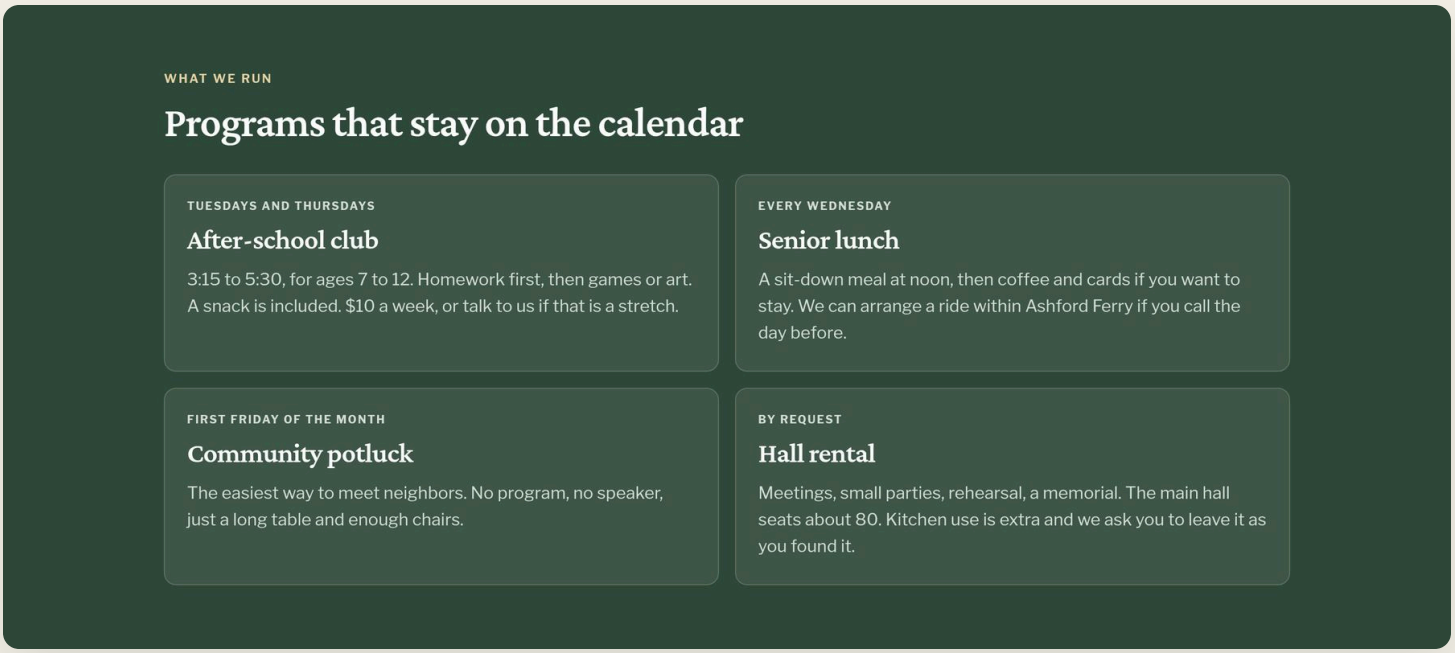

DESKTOP

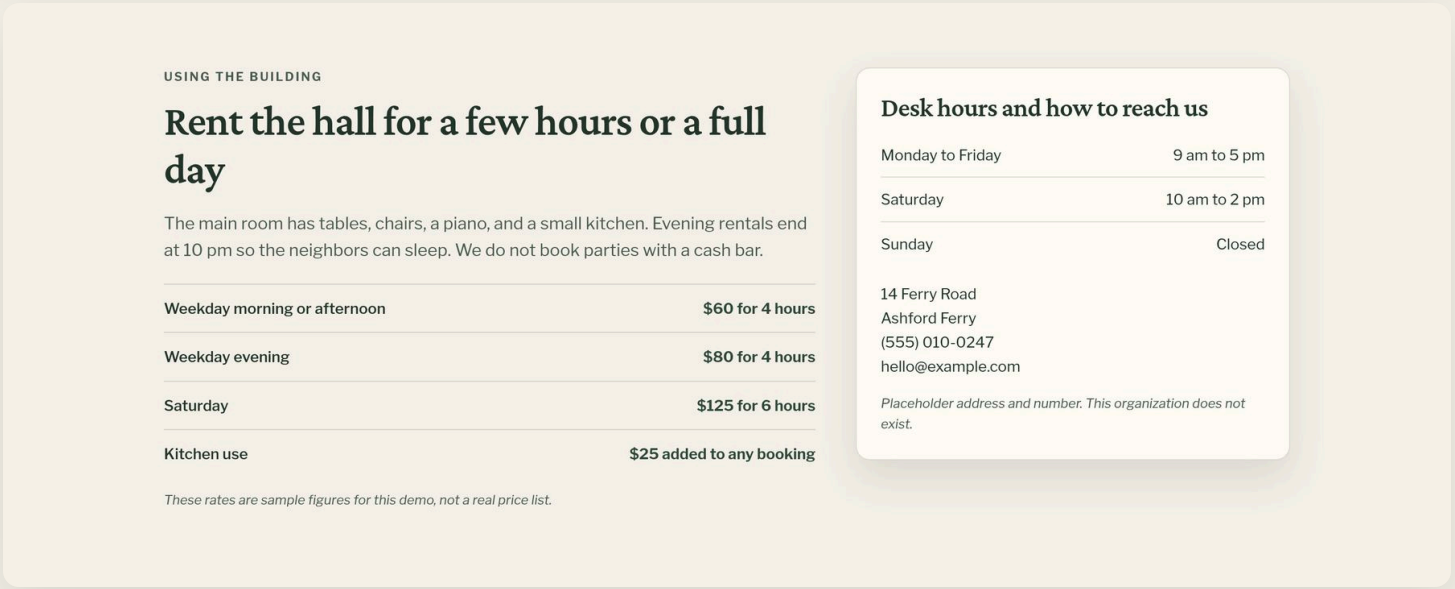

PHONE

Programs, hall rental, and hours

On a real build I would swap in the organization's name, photos, hours, rates and contact details. Everything here is a placeholder, including the sample rental prices and the 555 number.
